

Q2 Earnings Release

August 21st, 2025

Our mission

**Revolutionise R&D process
management with a user-
friendly software platform
that integrates all tasks
seamlessly**

innoscripta at a glance

Note(s): (1) As of June 2025; (2) Based on the company's experience with market participants; (3) Customer churn rate refers to number of customers contracts terminated divided by the sum of the existing and newly signed customer contracts in the respective year; (4) EBIT 2024 is adjusted for IPO costs (c. €731k); Source(s): OECD, Gross domestic spending on R&D (2022), converted using EUR/ USD FX Rate of \$1.11; OECD, Main Science and Technology Indicators

Update on German R&D tax incentive regulation

Upward trajectory on German tax incentive law since 2020

Key highlights

- **R&D tax reforms** proposed by the **German government** to **raise the ceiling to of the funding cap from €10m to €12m**, came into effect on 19th July
- Introduction of a **20% flat-rate overhead surcharge** on **eligible R&D expenditures** under the tax incentive
- These measures will **apply to R&D projects beginning on or after 1 January 2026**, and run **through to 2030**

The reforms are expected to increase innoscripta's average revenue per client without needing to grow its customer base

Q2 Trading update

The background features a dark teal gradient. A prominent, glowing blue wave-like shape curves across the lower half of the frame. This shape is composed of numerous small, bright blue dots or particles, creating a sense of motion and digital data. The overall aesthetic is modern and tech-oriented.

We are well-positioned to capture multi-dimensional growth opportunities

The background is a solid teal color. A large, glowing arc of small, light-blue particles curves across the middle of the frame, starting from the left and ending on the right. The particles are more densely packed in the center of the arc, creating a sense of motion and depth.

Q&A

Appendix

The background is a dark teal color. A glowing, particle-like arc curves across the lower half of the image, composed of many small, bright dots. The word "Appendix" is written in white, sans-serif font on the left side of the image.

Healthy Gross Profit driven by ownership of our tech stack

Current shareholder structure

Shareholding update

- Shareholding structure features **strong management presence** to confirm **long term commitment into innoscripta growth plans**
- Post IPO, the **CEO and CFO** have committed to **365 days of lock-up period** and the **current COO as well as other shareholders to 180 days of lock-up period**, showing strong commitment to the innoscripta story
- On **June 17th**, the **CEO and CFO** have further **committed to purchase up to €12m worth of innoscripta shares**, in order to further support the aftermarket performance
- **~17% free-float**

Note(s): (1) Participation vehicle in the legal form of a limited partnership for a total of 22 of the Company's employees, further shareholders include Hohenester Beteiligungs-UG, COO Sebastian Schwertlein, and Meyer Beteiligungs-UG, as well as certain external investors; (2) Including other pre-IPO shareholders such as Sebastian Schwertlein
Source(s): Company information as of 30th June 2025

Overview of cyclicity and revenue recognition

German R&D Tax incentive filing cyclicity

German R&D Tax incentive filings
Quarterly additions (applications k)

Market:

- Data from the German BSFZ indicates a **consistent pattern among German corporates** of claiming R&D Tax incentives in Q3 and Q4, typically aligned with year-end financial reporting processes

innoscripta:

- A **considerable number of applications for R&D Tax incentives**, and the largest number of applications handled using the innoscripta Platform, are **approved by the BSFZ during the Q4**

Revenue and cash recognition

- Historically we have observed a **lag of three months between filing of an application for R&D Tax incentives and its approval**
- This seasonal surge in activity directly impacts our revenue recognition, as **revenue is only recorded once an application is approved by the BSFZ**. As a result, **the second half of the year becomes a critical period for revenue generation**
- From a **cash perspective**, we generally collect **2/3 of the revenue upon BSFZ approval** and the remaining **1/3 after 180 days**
- As we grow our business further, seasonality could become more pronounced over time as we **continue to target mid-sized and large enterprises and concentrate less on small enterprises** in the future

Disclaimer

This presentation as well as remarks, comments, and explanations in this context contain forward-looking statements regarding the business development of innoscripta SE and its consolidated subsidiaries. Forward-looking statements are partly, but not exclusively, identified by their use of a date in the future or such words as “expect,” “intend,” “should,” “believe,” “plan,” or “aim.” These statements are based on assumptions relating to the development of the economic, political, and legal environment in individual countries, economic regions, and markets, and in particular the SaaS industry, which we have made on the basis of the information available to us at the time of publication and which we consider realistic at that time.

By their nature, forward-looking statements are inherently subject to risks. The realization of these known and unknown risks may cause actual results, financial figures, and future developments of the company to differ from those expressed or implied by these forward-looking statements. Any changes in significant parameters relating to our key sales markets or any significant changes in our business activities will have a corresponding impact on the development of our business.

Except as otherwise required by applicable laws and regulations, we do not intend to update these forward-looking statements. Such statements are valid on the date of publication.

This information does not constitute an offer to exchange or sell, or an offer to exchange or purchase, any securities.

Please note that certain figures in this presentation have been rounded.
